

## GQ Series Indicators

Mounting Hole Diameter: 6/8/10/12/14/16/19/22/25mm  
 Body Material: Nickel Plated Brass / Stainless Steel / Black Plated Brass  
 Terminal: Screw Terminals / Wire Leads 150mm / Solder Lug  
 Lens Shape: Domed / Flat Round  
 IP Degree: IP67  
 Lens shape and mounting hole size can be customized

### Part Number Description

GQ★■□/◆/△/▲/◎

| Symbol | Indication             | Descriptions   |
|--------|------------------------|--|
| ★      | Mounting Hole Diameter | 6: Φ6mm / 8: Φ8mm / 10: Φ10mm / 12: Φ12mm / 14: Φ14mm / 16: Φ16mm / 19: Φ19mm / 22: Φ22mm / 25: Φ25mm              |
| ■      | Lens Shape             | G: Domed / T: Flat Round Type1 / F: Flat Round Type2   |
| □      | Illumination Type      | D: Steady light / SD: Flashing Light (Customized)  |
| ◆      | Terminal               | L: Screw Terminals / Y: Wire Leads 150mm / No letter means solder lug  |
| △      | Lamp Color             | R: Red / G: Green / Y: Yellow / B: Blue / W: White   |
| ▲      | Lamp Voltage           | 6V, 12V, 24V, 110V (With external resistor), 220V (With external resistor Rated Voltage for flashing light: 6~24V) |
| ◎      | Body Material          | N: Nickel Plated Brass / S: Stainless Steel / A: Black Plated Brass  |

### Performance characteristics

|                       |  |
|-----------------------|--|
| Operating Temperature | -25℃~+55℃(no freezing),<br>Keep air flowing around the indicator |
| Operating Humidity    | 45~85%RH (no condensation)                                       |
| Insulation Resistance | ≥100MΩ(500VDC)   |
| Dielectric Strength   | 1500V RMS 50Hz 1 minute  |
| Vibration Resistance  | 50Hz, 1.2mm amplitude  |
| Soldering Temperature | 320℃ 3 seconds   |
| Standard              | GB/T 14048.5-2017  |

### Flashing Light Rating

| Rated Voltage | Rated Current | Frequency  |
|---------------|---------------|--|
| 6~24V         | 20mA          | 160 flashes per minute (Other frequency can be customized) |

### Lamp Ratings

| LED Life     | Rated Current                          | Voltage Fluctuation  | Diagram  |
|--------------|--|----------------------|--|
| ≥40000 hours | ≤24V approx. 15mA<br>≥110V approx. 2mA | DC: ±10%<br>AC: ±20% | <p>With built-in resistor; AC/DC Lamp;<br/>No difference of anode or cathode.<br/>External resistor is need for voltage<br/>≥110V (Φ6-14mm indicators)</p> |

## AD16 Series Pilot Indicators

The AD16 Series pilot indicators use LED as light sources. The advantages are long life, low energy consumption, small volume and light weight. It is an alternative to the XD-type incandescence lamp and neon lamp. The lens is made of high-strength polycarbonate. It has good impact resistance and built-in screw-type wiring, which is safer and convenient. This series of pilot indicators are suitable for signal indicators, forecast signals and other indications signals in the lines of electrical power, telecommunications, machine tools, ships, textiles, printing, mining machinery and other equipments.

- Notice**
1. The usage frequency of the AC-type pilot indicators is 50-60Hz. Using in other frequency segments will damage the item.
  2. The starting voltage of the anti-interference indicator is 35~45V. If you need a higher starting voltage, please advise. Please check the wiring if the interference voltage is too high.
  3. Wiring errors are not allowed on AC type Dual-color indicator, otherwise the item will be damaged.
  4. Avoid using welding to connect if possible, please use plug(2.5×0.8mm) to connect and the protective cover should be used; If welding is needed, the soldering iron should below 30W and welding should be done within 3 seconds. External force should not be performed to the terminal.

### Diagram

|                        | AC/DC Single Color Indicator | AC Single Color Indicator | AC-DC Dual-color Indicator                     | AC Dual-color Indicator        |
|------------------------|------------------------------|---------------------------|--|--------------------------------|
| Normal Type            |                              |                           | <p>Red: X1-X0 Green: X2-X0 (Yellow: X1-X2)</p> | <p>Red: X1-X0 Green: X2-X0</p> |
| Anti-interference Type |                              |                           | <p>Red: X1-X0 Green: X2-X0 (Yellow: X1-X2)</p> | <p>Red: X1-X0 Green: X2-X0</p> |

- Note:**
1. Built-in resistor for AC/DC indicator; Capacitor is used in AC indicator.
  2. When voltage is 110V or above, the temperature of AC/DC indicator shell is higher than AC types.

### Specifications

Mounting Hole Diameter: Φ8mm, Φ12mm

Lamp type: LED

Rated Current: 2mA~20mA

Mounting Nut Torque: About 0.1Nm

Panel Thickness: 6mm Max.

Terminal: Wire Leads 150mm

Body Material: Nickel Plated Brass / Black plated Brass / Stainless Steel

Lens Material: Epoxy(UV resistant can be customized)

Base: PA

IP Rating: IP67; IK06(Flat round type only)

RoHS can be Customized

**Specifications**

- Mounting Hole Diameter: Φ16mm
- Switch Rating: 2A / 36VDC  
0.5A / 220V
- Contact Configuration: 1NO
- Function: Momentary
- Terminal: Solder Lugs(2×0.5mm)
- Switching: X(Double-break Slow-motion contact)
- Panel Thickness: 1~6mm
- Mounting Nut Torque: About 0.6Nm
- Mechanical Life: 1,000,000 cycles
- Electrical Life: 50,000 cycles
- Actuator Material: Stainless steel
- Body Material : Stainless steel
- Base: PA
- Actuation Force: About 4N
- Actuation Travel: About 2mm
- Protection Class: IP65(IP67 can be customized), IK08
- RoHS can be Customized

**Performance characteristics**

|                       |  |
|-----------------------|--|
| Operating Temperature | -25°C ~+55°C (no freezing)<br>Keep air flowing |
| Operating Humidity    | 45~85%RH(no condensation)                      |
| Contact Resistance    | ≤50mΩ  |
| Insulation Resistance | ≥100MΩ(500VDC)                                 |
| Dielectric Strength   | 1500V, RMS 50Hz, 1 minute                      |
| Vibration Resistance  | 50Hz, amplitude about 1.2mm                    |
| Soldering Temperature | 320°C 3 seconds                                |

### Specifications

- Mounting Hole Diameter:  $\Phi 19\text{mm}$
- Contact Configuration: 1NO1NC
- Terminal: Solder Lugs(2.8×0.5mm)
- Switching: C(Singal-break fast-motion contact)
- Switch Rating: 5A / 250VDC
- Contact Resistance:  $\leq 50\text{m}\Omega$
- Insulation Resistance:  $\geq 100\text{M}\Omega(500\text{VDC})$
- Dielectric Strength: 1500V, RMS 50Hz, 1 minute
- Operating Temperature:  $-25^{\circ}\text{C}\sim+55^{\circ}\text{C}$  (no freezing)
- Mechanical Life: 1,000,000 cycles
- Electrical Life: 50,000 cycles
- Panel Thickness: 1~10mm
- Mounting Nut Torque: About 0.6Nm
- Actuation Force: About 2N
- Actuation Travel: About 3.1mm
- Actuator Material: Stainless steel
- Body Material : Stainless steel
- Base: PBT
- Actuation Force: About 4N
- Actuation Travel: About 2mm
- Protection Class: IP65(IP67 can be customized), IK08
- RoHS can be Customized

### Switch Rating

RoHS

### Terminal Arrangement

Pin 1,2,3,4 are one set;  
 1,2 are normal closed(NC);  
 3,4 are normal opened(NO).  
 The lamp and switch are relatively independent and you can use switch or peripheral circuit to control the lamp state.

### Switch Rating

## HBJD Series Signal Tower Lights

Operating Temperature: -25°C~+55°C

Air Humidity: ≤98%

Altitude: 2000m

Vibration Resistance: 50Hz amplitude about 1.2mm

LED Life: 40000hours LED(Steady Light)

25000hours(Flashing Light)

Buzzer Volume: 80~90dB, at 1m

Pollution Degree: 3

Wiring Diagram

Note: Two Common wires can't be connected with LED/buzzer wires at the same time.

**Attention**

- Ensure power is turned off before wiring.
- No open fire around this product, operating temperature ≤ 55°C.
- Wires must be approved by safety usage standard.
- Base and connecting part assembly must be stable.
- Installation and maintain of this product must be operated by professional.

| ■      | Layer          | 1: Single Layer / 2: Two Layers / 3: Three Layers / 5: Five Layers  |
| △      | Color          | R: Red / G: Green / Y: Yellow / B: Blue / W: White For multilayers, specify illumination color from top to bottom             |
| ▲      | Voltage        | 24V (Voltage range: 24V~220VAC/DC) / 12VDC (Customized)   |
| ●      | Mounting Style | A: Standard / B: Pole Mounting with Base / C: Side Mounting / D: Pole Mounting with Foldable Base / E: Foldable Base          |

**Wiring Diagram**

**Attention**

- Ensure power is turned off before wiring.
- No open fire around this product, operating temperature  $\leq 55^{\circ}\text{C}$ .
- Wires must be approved by safety usage standard.
- Base and connecting part assembly must be stable.
- Installation and maintain of this product must be operated by professional.

Features

- ⊙ Operating Temperature: -25°C~+55°C
- ⊙ Air Humidity: ≤98%
- ⊙ Altitude: 2000m
- ⊙ Vibration Resistance: 50Hz amplitude about 1.2mm
- ⊙ LED Life: 40000hours LED(Steady Light)  
25000hours(Flashing Light)
- ⊙ Buzzer Volume: 80~90dB, at 1m
- ⊙ Pollution Degree: 3

Specifications

Dimensions

Mounting Hole Diameter:  $\Phi 16\text{mm}$   
 Sound Type(□): Continuous Sound(M) / Discontinuous Sound(JM)  
 Supply Voltage(▲): DC12V / DC24V  
 Rated Current:  $\leq 30\text{mA}$   
 Buzzer Volume:  $\geq 85\text{dB}$ (at 0.1m distance) /  $\geq 75\text{dB}$ (at 1m distance)  
 Body Material: Stainless Steel  
 IP Rating: IP40, IK04

Mounting Hole Diameter:  $\Phi 19\text{mm}$   
 Sound Type(□): Continuous Sound(M) / Discontinuous Sound(JM)  
 Supply Voltage(▲): DC12V / DC24V  
 Rated Current:  $\leq 30\text{mA}$   
 Buzzer Volume:  $\geq 85\text{dB}$ (at 0.1m distance) /  $\geq 75\text{dB}$ (at 1m distance)  
 Body Material: Stainless Steel  
 IP Rating: IP40, IK04

Mounting Hole Diameter:  $\Phi 19\text{mm}$   
 Sound Type: Flashing Buzzer(SM)  
 LED Color(△): R Other color can be customized  
 Supply Voltage(▲): DC12V / DC24V  
 Rated Current:  $\leq 30\text{mA}$   
 Buzzer Volume:  $\geq 85\text{dB}$ (at 0.1m distance) /  $\geq 75\text{dB}$ (at 1m distance)  
 Body Material: Stainless Steel
